HARDY PERENNIALS

The old time fondness for these beautiful flowers has come again and we find a constantly increasing demand. Also we have new and improved varieties that our grandmothers did not know. Those who have passed our nursery on Chicago Avenue know what can be done in perennial planting.

Hardy Perennial Flowers.

Flowering plants that live from year to year, yielding a high rate of interest in increasing flowers and beauty naturally recommend themselves first of all for the garden. They offer all shades of coloring, heights and habits of growth, and times of flowering necessary for any desired effect; and require the least care of any flowers.

They have a much longer planting season than shrubs and trees, beginning the first of September and continuing until the ground freezes in the fall and in the spring as soon as it opens until the first of July and sometimes later.

Through long experience we have selected the very best kinds of this type of plants and the best varieties of each kind. The average small garden is not an undertaking that warrants buying a design separately although it is just as necessary as good plants. It is to give our customers this unusual advantage that we have specialized in garden designing.

We will make suggestions or sketches, or personally supervise planting without extra charge where the order amounts to \$15.00. Plant early in the season to give the roots a chance to make a growth before the next flowering season.

Prices named are for good strong plants, but when very heavy clumps are desired we can supply them in many varieties at \$3.50 per dozen or \$25 per hundred.

The smaller sizes we will send by parcel post, prepaid, at these dozen rates.

**FIFTY THOUSAND PEONIES
IN CHOICE NAMED VARIETIES.**

By close observation and a careful selection of the best sorts offered, we have approximated our conception of a choice collection.
